

What is claimed is:

1. A disposable diaper comprising:
a diaper body having an outer surface;
5 a first layer secured to the diaper body;
a second layer secured to the diaper body to form a pocket
between the first and second layer; and
a means for sealing the pocket for containing waste and
odor.

10

2. The disposable diaper of claim 1 wherein the first
layer and the second layer are waterproof.

15

3. The disposable diaper of claim 1 wherein the sealing
means is a tape strip attached to a first surface of the
second layer.

20

4. The disposable diaper of claim 1 wherein the tape strip
has a releasable protective facing.

5. The disposable diaper of claim 1 wherein the sealing
means is an interlocking closure.

25

6. A method for disposing of a diaper, comprising the
steps of:

providing a diaper body having an outer surface pocket
formed on the outer surface of the diaper body;
rolling the diaper body inwardly toward the pocket;
inverting the pocket to receive the diaper body; and
30 sealing the pocket to enclose the diaper body.

7. A disposable diaper comprising:
a diaper body having an outer surface;
a layer secured to the diaper body to form a pocket between
the layer and the outer surface; and
5 a means for sealing the pocket for containing waste and
odor.

8. The disposable diaper of claim 7 wherein the layer is
waterproof.

10

9. The disposable diaper of claim 7 wherein the sealing
means is a tape strip attached to a first surface of the
layer.

15 10. The disposable diaper of claim 9 wherein the tape strip
has a releasable protective facing.

11. The disposable diaper of claim 7 wherein the sealing
means is an interlocking closure attached.
